

Accessing Online Sites Used at School

To assist any students in your household with continuing their learning at home, simply have them log in to the Clever Portal using the directions provided below. Instead of having usernames and passwords for the large amount of online programs we use, students use a QR code, seen below to log in.

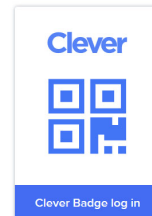

STEP 1

Go to clever.com and click “log in as a student”

STEP 2

Click on “Clever Badge log in” located on the left side of the window. When prompted, allow the program access to your webcam or your phone’s camera. This will allow you to scan your child’s QR code during Step 3.

STEP 3

This is the unique QR code for your child to log onto the program. Using your device’s camera, hold up the code to the camera. This will log your student in.

Use the QR code provided by your KIPPster’s teacher or text your teacher for the QR code image.

STEP 4

After logging in, students will be taken to their homepage where they can access all program we have purchased as a school. Below is an outline of key programs for student use.

Moby Max

This is the main program used in our school and covers all subjects and is tailored to meet the student’s level.

Scholastic

This program provides students thousands of e-books and read alouds at their level.

Zearn

Many classrooms use Zearn for math practice. Students log in and have lessons to complete.

Typing Club

A student favorite, this program teaches students to type through fun games.

Epic

Epic allows students to access thousands of books and videos at their level. The code to access the site is onh8594
